PAILLARD NON-MAGNETIC WATCHES.

Possesses all the merits of other makes with the additional advantage of being thoroughly non-magnetic and unaffected by moisture. They have withstood the most severe tests and exacting criticism, and stand to-day without a peer. We guarantee them to be as fine time-keepers (grade for grade) as any watches made, and superior in finish and intrinsic value.

No. 45. \$32 00

15 Ruby Jewels in Gold Settings; Adjusted to Temperature, Isochronism and three positions; Breguet Hair-spring; Patent Micrometer Regulator; Double Sunk Dial. Endorsed by members of the Brotherhood of Locomotive Engineers and by Railroad men in general.

To show how small a variation will vitiate time, we will state that in an ordinary watch the balance vibrates five times per second, 300 times per minute, 18,000 per hour, 432,000 per day. This is the exact work the balance-wheel has to perform in order to supply the requirements of perfect time-keeping. Now, if we bring any influence to bear upon this balance-wheel or interfere with the vibrations of the balance to the extent of 1-1,000 part, it will make a difference of fifteen minutes.

The above will convince any thinking man that the only watch that is absolutely reliable is one protected from Electricity. This line of movements are the only ones on the market that possess this important advantage.

If you are in need of a watch which can be depended upon for accurate and reliable time under all conditions, order a

No. 81. \$30 00

15 Ruby Jewels in Gold Settings; Adjusted to Temperature, Isochronism and Four Positions; Breguet Hair-Spring; Patent Micrometer Regulator; Gold Screws; Double Sunk Dial.

Thomas A. Edison, the World's Greatest *Electrician* writes the following letter:

Gentlemen:—During the past six months I have submitted the watches containing Paillard's Patent Non-Magnetic Compensation Balance and Hair-Spring to tests in different fields of magnetism. I find them exempt from magnetic influence, however strong, and practically no retardation of the balance, no change in rate occurs, even when in actual contact with dynamos, or powerful electro-magnets.

I have been carrying one of your watches in my pocket and going around dynamos and other electrical appliances where I have never been able to carry a watch without ruining it, and it has proved an excellent time-keeper. I consider Paillard's Balance and Hair-Spring a most wonderful and valuable invention, not only for workers around dynamos, but wherever accuracy of time is required.

SOMETHING ENTIRELY NEW, AND MADE ONLY BY SETH THOMAS CLOCK CO.

8-DAY, HALF HOUR STRIKE, CATHEDRAL BELL

Height, 11 inches; Base, 17 inches; Price, \$6.50.

Adamantine is very highly finished, one of the best and Handsomest Clocks there is. With ordinary care, it will wear a lifetime. Its durability being so great, the ordinary wear and tear that has proved so disastrous to all other Enameled Clock Cases makes no impression on it. Its indestructible qualities make it impervious to the elements. It can be washed or otherwise cleaned without detriment to the lustre or polish, to which it is susceptible in a high degree. It is the only Enameled Clock Case on the market that will not dent or peel off or be scratched like other Enameled Clock Cases.

This Clock is a Genuine SETH THOMAS, made by the celebrated Seth Thomas Clock Co., which has a world-wide name and reputation.
